To Whom It May Concern:

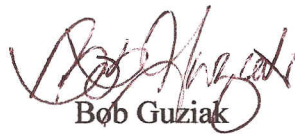

It has been our privilege to work with Profitable Glass Solutions since our inception in 2007. Their input into our business model was invaluable leading to significant cost savings compared to other business models within the automotive glass replacement industry.

We leaned heavily on Profitable Glass Solutions to conduct internal training classes during rollout including Point of Sale software and windshield repair. The effectiveness of their training assured us of meeting our targeted launch date without disruption. Further, the quality of training was so effective; we have not encountered the need for re-training.

We highly recommend the services of Profitable Glass Solutions for any business interested in entering or improving their position in the automotive industry. Their business intellect, coupled with their ethical fiber, make them the perfect business partner.

Sincerely,

John Cox
Vice President
